2010 NATIONAL LAND TRUST CENSUS REPORT

IDAHO

New Report Shows Strong Growth in Land Conservation

A new report by the Land Trust Alliance shows that land conservation by nonprofit land trusts across the United States is thriving, with more than 10 million acres conserved from 2005 to 2010. Land trusts in Idaho contributed to this success, reporting an increase of 10% in acres conserved over this period.

The Land Trust Alliance has reported on the status and successes of land trusts since its founding in 1982. The National Land Trust Census measures the pace and quality of the important conservation work of local, state and national land trusts in the United States.

Idaho's Trends in Conservation: 2005–2010

- Land trusts in Idaho have protected 84,837 acres—this represents a 75% increase in acres conserved since 2005. Idaho ranks 33rd in the nation in acres conserved, and 4th in the Northwest.
- There are now 12 land trusts operating in Idaho, including 10 staffed groups and 2 all-volunteer groups.
- Idaho increased their full- and part-time staff and contractors 88% in 5 years, for a total of 45 paid positions in 2010.
- Land trusts in Idaho drew upon the work of 578 active volunteers (an increase of 285% since 2005) and the contributions of 3,419 members and financial supporters.
- As a signal of the land trust community's commitment to excellence, there are now 2 accredited land trusts in Idaho. Together, these 2 groups have protected 42,461 acres as of 2010.

The mission of the Land Trust Alliance is to save the places people love by strengthening land conservation across America. Land trusts are nonprofit organizations that work with private land owners to voluntarily conserve forests, farms, parks, and other cherished places that enrich our lives. We focus our work on three strategic goals: accelerating the pace, improving the quality, and ensuring the permanence of conservation. By building highly effective and well-governed land trusts that protect lands with the highest values to their communities and ensure their protection in perpetuity, we can preserve healthy human and natural communities, clean air and water, beautiful vistas, recreation areas, and working lands.
